FLAGSHIP LAUNDRY CARE

New PRITE Detergent Powder

Formulated with active oxygen micro-enzymes that dissolve deep into fabrics to eliminate stubborn mud, grease, curry, and collar grime without fading cloth brightness or damaging delicate fibers.

- ✓ Deep Clean Active Enzymes
- ✓ Color-Lock Protection
- ✓ Fresh Floral Perfume
- ✓ Machine & Hand Wash Friendly

Pack Type	Net Weight	Application	Packaging
Small Pouch	500g / 1kg	Daily Family Laundry	Moisture-Proof Polybag
Value Saver	3kg / 5kg	Top & Front Load Wash	Heavy-Duty Handle Bag
Commercial Bulk	10kg / 25kg	Laundromats & Hostels	Woven Sacks / Buckets

KITCHEN CARE FORMULA

New PRITE Dish Wash Gel / Liquid

Ultra-concentrated grease-cutting gel powered by real lemon extracts. Lifts heavy burnt food residue, ghee, and burnt oils instantly, leaving kitchenware squeaky clean with sparkling shine and zero white residue.

- ✓ 1 Spoon Cleans a Sink Full
- ✓ 100% Zero White Chalk Residue
- ✓ Natural Citrus Lemon Fragrance
- ✓ Gentle & Safe on Hands

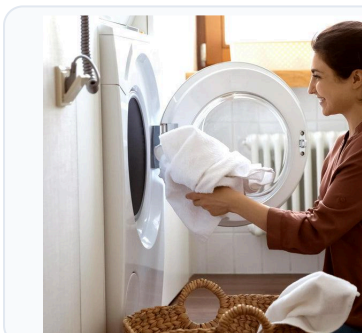

Pack Type	Volume	Features	Case Packing
Retail Bottle	250ml / 500ml	Flip-top & Pump Dispenser	24 Units / Box
Family Refill	1 Litre Pouch	Spout Cap Economical Pack	12 Units / Box
Commercial Can	5 Litre Can	Catering & Restaurant Grade	4 Cans / Box

INSTITUTIONAL & BULK CARE

Bulk Commercial Solutions

Tailored formulations for institutional bulk buyers including hotel chains, hospitals, commercial laundries, and restaurant canteens. Competitive volume pricing and customizable batch concentrations.

- ✓ High-Efficiency Surfactants
- ✓ Low Foam / Machine Optimized
- ✓ Reliable Batch Consistency
- ✓ Direct Manufacturer Supply

Wholesale & Distributorship

Direct factory supply, regional exclusive dealerships, and retail distribution support.

NEW PRITE Antimicrobial Intimate Fabric Wash

Targeted innerwear hygiene engineered to eliminate the warm, humid microclimate (35–37°C, 70–90% humidity) where bacteria & fungi thrive.

99.9%

GERMS KILLED (AATCC 100)

STEP 1 — STRIPS RESIDUE

SLES + APG + CAPB

Lifts deep protein deposits, sweat, discharge, and dead skin. Zero organic residue = zero food for bacteria.

STEP 2 — KILLS PATHOGENS

Piroctone + Climbazole

Fortified with Tea Tree & Neem. Proven to kill E. coli, S. aureus, Candida albicans & Klebsiella on contact.

STEP 3 — PH NEUTRALISER

pH 4.5–5.2 Shield

Gluconolactone (PHA) & Lactic Acid match skin's acid mantle, locking fabric into an anti-germ environment.

Clinical Comparison: Regular Detergent vs. PRITE Intimate Fabric Wash

Without PRITE (Regular Wash)	With PRITE Protection	Active Ingredients
Organic residue stays on fabric	Strips all residue from fibres	SLES + APG + CAPB Surfactants
Microclimate is warm & hospitable	pH 4.5–5.2 makes fabric hostile to germs	Lactic Acid + Gluconolactone (PHA)
Bacteria multiply (1 to 1,000 in 3h)	Kills 99.9% bacteria on fabric	Piroctone Olamine + Tea Tree + Neem
Fungi thrive in moist fabric	Kills Candida & dermatophytes on contact	Climbazole (0.3%) + Piroctone Olamine
Odour, itching & skin infection risk	Residue-free fabric — safe contact	Complete Multi-Barrier Formulation

Key Clinical Fact: A study on regularly washed innerwear found up to **10,000 living bacteria per cm²** even after a standard detergent wash. Regular detergent removes surface dirt — but not the microclimate that breeds germs.

✓ Paraben-Free

✓ pH Balanced 4.5–5.2

✓ Fabric Safe

✓ Dermatologist Tested

✓ Made in India

Pack: 300 ml Bottle

Commercial Distribution

Available for pharmacy chains, supermarkets, retail distributors & e-commerce trade.
